

Location: Duxford, Cambridgeshire  
Budget: £1,700,000  
Date: 2014  
Status: Pre-Planning

# Duxford Community Centre

for Duxford Parish Council

**civic** has been working closely with the wider community of Duxford to develop designs for its first significant public building in many years.

Duxford is a rurally isolated, medium sized village which has no community facility at all. The village is experiencing an incremental withdrawal of core services and is now embracing the ethos of Localism to take control of its own community provision.

The proposal is to build an environmentally desirable and financially sustainable multi-functional Community Hub incorporating energy efficiency measures and renewable technologies which will meet the needs of the whole community now and well into the future.

A suite of interlinking and various sized spaces will provide flexible accommodation for a wide variety of activities and initiative. This will include community led youth provision, sport, recreation, education, leisure and tourism.
